

Clustajet

The Clustajet is a range of compressed-air movers that are lightweight, shockproof and easily carried. They have no motors, rotating blades, are flameproof and virtually maintenance free.

Using flexible hoses they can be used for 2 applications:-

Blowing and producing fresh air; or Extraction of poor quality air from confined spaces.

Rugged and durable: The units are constructed in a robust steel casing, the air flow being provided through a single or a number of alloy inner jets known as Ring jets. A standard BSP valve controls the flow on/off.

Easy to use: The Clustajet is particularly useful in hazardous areas for ventilating sewers, tunnels, tanks and any similar spaces requiring the transport of air, dust, fumes, or dangerous gases over long distances.

Flexibility: When needed, Clustajet's can be connected in series by using rigid or flexible hoses.

Model	Size (mm)	Height (mm)	Length (mm)	Weight (kg)	Inlet	Air Flow (M ³ /HR)
CJ425	102	180	230	2.5	RC ¼"	765
CJ620	152	254	356	3.0	RC ½"	1105
CJ825	203	305	457	5.7	RC 1"	2091
CJ1250	300	406	508	13.6	RC 1"	5270
