

EZiTRACE™

The EZiTRACE™ dual frequency generator is the perfect tracing partner for the EZiCAT™ locator. When used with the EZiSYSTEM™ accessories and the EZiCAT™, the EZiTRACE™ can help you trace the more difficult buried services without a naturally present signal. Enclosed in a high impact structural polypropylene case, the EZiTRACE™ is a tough piece of equipment built to last on the rough construction environment

Features

- Choice of frequencies for maximum site flexibility
- Induction and connection output modes
- Rugged sealed case for durability
- Operates with a wide range of location equipment
- Supplied with crocodile connection cable set and earth spike, six AA batteries, user manual and certificate of conformity
- Variable output level
- Battery and output level indicators
- Automatic mode selection (connection / induction)
- Digital microprocessor control
- Compatible with all EziSYSTEM accessories
- Network Rail approved (PADS No: 094/020052)

EZiROD™

The EZiROD™ is a length of coiled fibre-glass rod which enables the complete length of a non – metallic drain, duct or pipe to be traced when used in conjunction with the EZiTRACE™ and EZiCAT™. The EZiROD™ is available in coiled lengths of 30m, 50m or 80m and is connected to the EZiTRACE™ and inserted and pushed along the service under investigation. Using the EZiCAT™ to locate it on the surface, you can trace pipes which do not produce their own current and which you are unable to induce a signal into
