

Entry Control Board

A high level control for wearers of breathing apparatus in hazardous conditions is of utmost importance in order to ensure their safety by logging each wearers entry time and calculating their exit time (subject to breathing rate). This can be achieved by the use of a breathing apparatus control board in conjunction with an automatic distress signal unit.

We Offer:

- 4 Tally BA Boards
- 12 Tally BA Boards with Calculator
- 12 Tally BA Boards with Calculator and Rapid Deployment
- Optional Tripod and Board covers available
- Tallies sold separately
- Full range of communication equipment including radios, telemetric equipment and automatic distress signal unit
