

CSI-1000 Fuel Cell Entry Kit

The CON-SPACE Fuel Cell Entry Kit contains the equipment necessary to provide safe, reliable continuous two-way communication between a safety attendant and a confined space worker. The equipment can be used untethered or in conjunction with supplied air respirators for: general entries and maintenance in aircraft fuel cells. Accessories are available for negative/positive fuel pressure testing. Additional lengths of cable can be added to the kit to increase the entry distance to a maximum length of 1500 feet.

Features:

- Hands free two way voice communication
- Use in Encapsulated suits with respirators or any make/model of breathing apparatus
- No miscommunication leading to better teamwork
- Private network
- Emits no RF signals, tested to MIL-STD 461
- Intrinsically Safe
- Rugged, reliable and chemical resistant
- Extendable to 3 workers

Each Kit Contains:

- 1 x CSI 1100 Mini Module
- 1 x CSI 2130 Talk Box
