

CSI-2000 Rescue Kit

The CON-SPACE Rescue Communication Kit 1 is configured for a team of five rescuers consisting of two primary rescuers, two standby rescuers and a team leader, for entries of 100 feet (maximum distance 1500 feet). The system can be configured for up to fourteen people using available modules and accessories. The Command Module is battery powered, compact and lightweight making it completely portable. Three 1.5v alkaline 'C' cells provide 400 hour life on standby and all electronics are fuse protected. A low battery LED indicator gives 12 hour warning battery replacement, which can be accomplished easily via external access to the battery holder. The system and accessories are waterproof. The rugged moulded fibreglass enclosures, all external knobs, and signal cables with their Military connectors are impervious to a wide range of acids, alkalis, fuels, and other corrosive chemicals.

Features:

- Hands free two way voice communication
- Use with encapsulated suits & respirators or any make/model of breathing apparatus
- No miscommunication
