

Industrial Scientific MX6

The MX6 iBrid™ is more than an intelligent hybrid of Industrial Scientifics' best monitoring technologies. It's the first gas monitor to feature a full colour LCD display screen. The display improves safety with clear readings in low light, bright light or anywhere in between. Whether the work is outside, inside or underground, it's easy to see what gas hazards lurk in the immediate work environment. The colour display is more than eye catching; it allows the user to step through instrument settings and functions with an intuitive menu and the instrument's five-way navigation button. It even supports the option of on-board graphing for easily interpreted direct readings and recorded data. Plus, the MX6 iBrid is their most rugged instrument ever. It carries a lifetime warranty and is fully compatible with the DS2 Docking Station™ and iNet™ Instrument Network.

Features

- Monitor up to 6 gases simultaneously
- Multiple language and datalogging
- Meets the ATEX EEx ia d IIC T4 standard.
- Rugged design
- Colour graphic liquid crystal display
- Compact size 135 mm x 77 mm x 43 mm
- Lightweight: 409 g
- Rechargeable Lithium-ion Battery Pack
- 24 hours typical run time

Available Sensors:

CH₄, Cl₂, ClO₂, CO, CO₂, ETO, H₂, H₂S, HCl, HCN, LEL, NO₂, NO, NH₃, O₂, PH₃, PID, SO₂
