

Gotcha EVAC Kit

The Gotcha EVAC Kit is for use on elevated machinery, making it ideal when the casualty is not in imminent danger, cannot remain in their situation indefinitely and can escape the situation without assistance.

Suitable for evacuation from, automated racking systems, overhead cranes and elevated work platforms.

1. No cutting required
2. Evacuation direction – the EVAC is a descent evacuation kit and requires the evacuee to descend to a point of safety
3. Pre-assembled, so no assembly is required by the user
4. Lone evacuation – the kit is designed for a worker to be able to evacuate themselves in an emergency
5. One person use
6. 20 metre maximum working length
7. Training required

FEATURES:

- Lightweight/compact self-contained kit
- Auto-lock descender
- Anchoring Sling plus connecting steel karabiners
- Various lengths available
- Rope Protection
- Provided in clearly labelled, robust "Rescue" bag with attachment points for ease of carrying

Conforms to EN: 341 Class D
