

Gotcha Rescue Kit

The Gotcha Rescue Kit is a unique solution to a problem faced by all workers at height who use PPE for protection against falls. Whereas most rescue provision has focused on the more extreme activities carried out at height, the Gotcha kit is designed for workers who use common items of fall protection.

In the event of a fall their situation if suspended in a harness is just as serious as any other worker and a swift recovery is essential. The Gotcha Rescue kit will work effectively with conscious or unconscious casualties; the rescuer can carry out the rescue from a point of safety, the rescue can be carried out by a single person, no cutting is required and you can raise or lower the casualty in a controlled manner to the nearest point of safety.

- Suitable for rescue from – Fall Arrest Lanyards and Fall Arrest Blocks (Grabba required)
- This is a no cut kit – the casualty is raised to release their original attachment
- Rescue direction – you can raise or lower the casualty with this kit
- Pre-assembled – no assembly is required by the user
- Remote attachment – the casualty can be attached from a point of safety
- Single person use - the Gotcha is for raising or lowering a single person
- The Gotcha kit is available in four lengths
- Colour coded for simplicity

Kit Size	High Anchor Mode	Low Anchor Mode	Weight
