

## IKAR H12/18/24

This aluminium housed fall arrest block is a sturdy, low maintenance device fitted with a steel rope lifeline, terminated with a steel double action hook. The attachment anchorage point on the fall arrest block is an open steel handle, suitable for connection via a standard karabiner type connector, or a standard karabiner type connector with an anchorage sling, or a large karabiner.

The lifeline in this fall arrest block has been tested in a simulated fall over an edge and passed the German draft amendment EN360. However, not all "edges" will react in the same way as the tested steel edge, so when using this fall arrest block, every effort must be made to ensure that in the event of an arrested fall, the lifeline does not pass over an edge.

### FEATURES

- Aluminium housing.
- Proven fall arrest mechanism.
- Available with 12.0, 18.0 or 24.0 metre steel rope
- CE Approved to EN360:2002
- Unit weight: 5.9, 9.5 or 13.5 kg
