

3S Full Facemask

MSA's expertise in breathing protection is clear to see in their range of the full facemasks. Combining comfort with quality, a variety of useful accessories and a comprehensive range of filters ensure that the range is adaptable for use in a very broad range of working applications. The MSA range of masks is an excellent choice when working in hazardous environments.

The MSA 3S full face mask, the most successful mask design in the world with over 5 million units sold, has been upgraded. It offers even more user comfort and value, without changing the 3S classic style. The softer face seal, enlarged harness attachment areas and deeper chin cup combined with the proven classic design improves its efficiency while remaining one of the user's favourite full face masks. The MSA 3S mask offers everything a mask wearer needs; Comfortable materials, good communication, anti-fogging air flow, low weight, no pressure points, low breathing resistance and good vision. Available for use with filters with EN:148 thread, Breathing Apparatus and powered devices.

- 3S stands for 3 terms: Safety, Sight and Style
- All rubber parts made of skin compatible rubber compound or silicone
- Pressure-free fit due to wide sealing edge and deep chin stop
- Proven design
- Quick donning and removal
- Wide Range of EN:148 filters available

See our filter range datasheet for a full list of available filters.
