

Protector Phantom PPR2000

Based on the Protector Phantom, the PPR2000 power assisted full facemask is the latest Protector respirator designed for use in the most arduous of environments. It is designed to meet the latest performance criteria and recommendations of national and international bodies. The combination of comfort, high performance, reliability and economic through life costs makes the PPR2000 the obvious choice for applications as diverse as asbestos stripping and grain handling, lead oxide removal, and applications in the pharmaceutical and nuclear industries.
