

Protector Profile 40 Half Mask

The Protector Profile 40 is a premium half mask which has been designed to provide ultimate levels of comfort and safety. The clear facepiece is shaped to seal easily, without pressure, and to maintain that seal throughout use. Profile 40 has a standard 40mm filter thread and utilises an extensive selection of Pro2000 filters.

Features

- Available in two sizes
- LSR silicone face piece
- Broad, easy-fit face seal
- Fast don harness
- Single Filter

Head movements are absorbed by bellows folds in the facepiece to prevent slippage or leaks at the seal, and the fast-don harness keeps the mask comfortable and secure. The ribs inside the nose bridge seal without gripping, to ensure no outward leakage towards the eyes. This makes Profile40 particularly well suited for use with spectacles or goggles. In fact, Profile40 will fit comfortably and unobtrusively with most other types of PPE.
