

## Harness & Lanyard Training for MEWP Operators

**Duration** 1 Day

**Course Code** IKTHW

### Introduction

Course delegates will be provided with the information required of them to select the appropriate items of Personal Fall Protection Equipment to protect against the potential fall from height.

The session will include the requirements to perform a pre-use safety inspection of the equipment; the faults and dangers that may be identified; which items of FPE are appropriate for the intended MEWP; where to attach the lanyard in the MEWP; and, the dangers of falling. The session will not cover the practical skills required to perform a rescue of either a worker stranded in a MEWP that has suffered mechanical or hydraulic failure or of a worker who sustains an arrested fall – these skills are dealt with by other training sessions.

### Who Should Attend?

This training session is intended for both qualified and trainee MEWP operators.

### Training Methods

A high proportion of hands on demonstrations and practical exercises, supplemented with classroom based tutorials, comprehensive handout pack. Assessment will be by written test paper and observations during the practical elements of the course.

### Course Information

<b>Delegates</b>	Maximum of 10 Delegates per Course
<b>Location</b>	Either at Customers site or Total Protection (UK) Limited
<b>Pre-requisites</b>	IKTHA – Height Safety Awareness
<b>Medical</b>	Delegates should be mentally & physically fit to withstand the rigours of training
<b>Equipment</b>	All equipment will be provided by Total Protection (UK) Limited, however examples of customers own equipment is always useful.
<b>Certification</b>	Certificates are issued to all delegates who successfully complete the course and achieve the required standard in the assessment.
<b>Validity</b>	TPUK certificates are valid for 36 months.
<b>Lunch</b>	Refreshments are provided for courses at Total protection (UK) Limited
<b>Safety Notice</b>	Total Protection (UK) Limited reserve the right to refuse to train any individual or to halt or cancel the training course if, in the opinion of the instructor, safety is compromised. This could be due to an unsafe or unsuitable training environment; an individual's dangerous or poor conduct; the condition of any equipment supplied by the customer; or an individual suffering from health or fitness issues.  High winds, in excess of 20 mph, will also lead to the curtailment of any practical training session. IKAR GB instructors carry anemometers to accurately read the wind speed. Should any cancellation or stoppage happen due to the reasons given above, Total Protection (UK) Limited will endeavour to re-book the training as soon as it is safe to continue.
